

# FCC Part 15C Measurement and Test Report

#### For

## ENPING ENBAO ELECTRONIC CO., LTD.

B3, 3 Zone, Enping Park, Industrial Transfer Park of Jiangmen,

Guangdong, China

FCC ID: 2AILBDIGITAL-QUAD-B

FCC Rule(s): FCC Part 15.249

Product Description: wireless microphone bodypack transmitter

Tested Model: <u>DIGITAL-QUAD-B</u>

**Report No.:** <u>STR181182111</u>

**Sample Receipt Date:** <u>2018-11-16</u>

**Tested Date:** <u>2018-11-19 to 2019-01-02</u>

**Issued Date:** <u>2019-01-02</u>

Tested By: Ray Yang/ Engineer

Reviewed By: Silin Chen / EMC Manager

Approved & Authorized By: Jandy So / PSQ Manager

| Modulation:                       | QPSK              |
| Antenna Type:                     | Integral Antenna  |
| Antenna Gain:                     | 0dBi              |
| Lowest Internal Frequency of EUT: | 24.576MHz         |

Report No.: STR18118211I Page 3 of 23 FCC Part 15.249

TEST Model: DIGITAL-QUAD-B

#### 1.2 Test Standards

The tests were performed according to following standards:

<u>FCC Rules Part 15.249:</u> Operation within the bands 902-928 MHz, 2400-2483.5 MHz, 5725-5875 MHz, and 24.0-24.25 GHz.

ANSI C63.10-2013: American National Standard for Testing Unlicensed Wireless Devices.

**Maintenance of compliance** is the responsibility of the manufacturer. Any modification of the product, which results in lowering the emission, should be checked to ensure compliance has been maintained.

#### 1.3 Test Methodology

All measurements contained in this report were conducted with ANSI C63.10-2013,

The equipment under test (EUT) was configured to measure its highest possible emission level. The test modes were adapted accordingly in reference to the Operating Instructions.

#### 1.4 Test Facility

#### FCC - Registration No.: 125990

Shenzhen SEM Test Technology Co., Ltd. Laboratory has been recognized to perform compliance testing on equipment subject to the Commissions Declaration Of Conformity (DOC). The Designation Number is CN5010, and Test Firm Registration Number is 125990.

#### Industry Canada (IC) Registration No.: 11464A

The 3m Semi-anechoic chamber of Shenzhen SEM Test Technology Co., Ltd. has been registered by Certification and Engineering Bureau of Industry Canada for radio equipment testing with Registration No.: 11464A.

Report No.: STR18118211I Page 4 of 23 FCC Part 15.249

## 1.5 EUT Setup and Test Mode

The EUT was operated in the engineering mode to fix the Tx frequency that was for the purpose of the measurements. All testing shall be performed under maximum output power condition, and to measure its highest possible emissions level, more detailed description as follows:

| Test Mode List |                |          |  |
|----------------|----------------|----------|--|
| Test Mode      | Description    | Remark   |  |
| TM1            | Low Channel    | 904.6MHz |  |
| TM2            | Middle Channel | 913.3MHz |  |
| TM3            | High Channel   | 927.2MHz |  |

| Test Conditions   |           |  |
|-------------------|-----------|--|
| Temperature:      | 22~25 °C  |  |
| Relative humidity | 50~55 %.  |  |
| ATM Pressure:     | 1019 mbar |  |

# 2. SUMMARY OF TEST RESULTS

| FCC Rules      | Description of Test Item     | Result    |
|----------------|------------------------------|-----------|
| § 15.203       | Antenna Requirement          | Compliant |
| §15.205        | Restricted Band of Operation | Compliant |
| § 15.207(a)    | Conducted Emission           | N/A       |
| § 15.209(a)(f) | Radiated Spurious Emissions  | Compliant |
| §15.249(a)     | Field Strength of Emissions  | Compliant |
| §15.249(d)     | Out of Band Emission         | Compliant |
| §15.215 (c)    | Emission Bandwidth           | Compliant |

N/A: not applicable

 Report No.: STR18118211I
 Page 7 of 23
 FCC Part 15.249

# 3. Antenna Requirements

#### 3.1 Standard Applicable

According to FCC Part 15.203, an intentional radiator shall be designed to ensure that no antenna other than that furnished by the responsible party shall be used with the device. The use of a permanently attached antenna or of an antenna that uses a unique coupling to the intentional radiator shall be considered sufficient to comply with the provisions of this section.

#### 3.2 Test Result

This product has an Integral antenna, fulfill the requirement of this section.

Report No.: STR18118211I Page 8 of 23 FCC Part 15.249

Model: DIGITAL-QUAD-B

#### 4. Radiated Emissions

#### 4.1 Standard Applicable

According to §15.249(a), the field strength of emissions from intentional radiators operated within these frequency bands shall comply with the following:

| Fundamental Frequency | Field strength of fundamental (milli-volts/meter) | Field strength of Harmonics (micro-volts/meter) |
|-----------------------|---|---|
| 902-928 MHz           | 50  | 500   |
|                       |   |   |
| 2400-2483.5 MHz       | 50  | 500   |
| 5725-5875 MHz         | 50  | 500   |
| 24.0-24.25 GHz        | 250   | 2500  |

(d) Emissions radiated outside of the specified frequency bands, except for harmonics, shall be attenuated by at least 50 dB below the level of the fundamental or to the general radiated emission limits in §15.209, whichever is the lesser attenuation.

The emission limit in this paragraph is based on measurement instrumentation employing an average detector. The provisions in §15.35 for limiting peak emissions apply. Spurious Radiated Emissions measurements starting below or at the lowest crystal frequency.

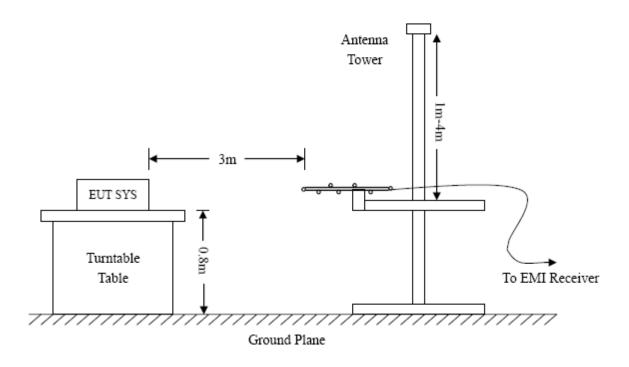

#### 4.2 Test Procedure

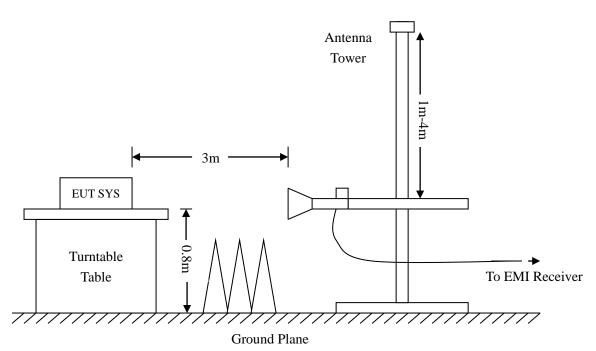

The setup of EUT is according with per ANSI C63.10-2013 measurement procedure. The specification used was with the FCC Part 15.205 15.249(a) and FCC Part 15.209 Limit.

The external I/O cables were draped along the test table and formed a bundle 30 to 40 cm long in the middle. The spacing between the peripherals was 10 cm.

Report No.: STR18118211I Page 9 of 23 FCC Part 15.249

Frequency:9kHz-30MHz

RBW=10KHz,

VBW = 30KHz

Sweep time= Auto

Trace = max hold

 $Detector\ function = peak$ 

Frequency:30MHz-1GHz

RBW=120KHz,

VBW=300KHz

Trace = max hold

Detector function = peak, QP

Frequency : Above 1GHz

RBW=1MHz,

VBW=3MHz(Peak), 10Hz(AV)

Sweep time= Auto

 $Trace = max \ hold$ 

Detector function = peak, AV

TEST Model: DIGITAL-QUAD-B

#### 4.3 Corrected Amplitude & Margin Calculation

The Corrected Amplitude is calculated by adding the Antenna Factor and the Cable Factor, and subtracting the Amplifier Gain from the Amplitude reading. The basic equation is as follows:

Corr. Ampl. = Indicated Reading + Ant. Factor + Cable Loss - Ampl. Gain

The "Margin" column of the following data tables indicates the degree of compliance with the applicable limit. For example, a margin of  $-6dB\mu V$  means the emission is  $6dB\mu V$  below the maximum limit. The equation for margin calculation is as follows:

Margin = Corr. Ampl. – FCC Part 15C Limit

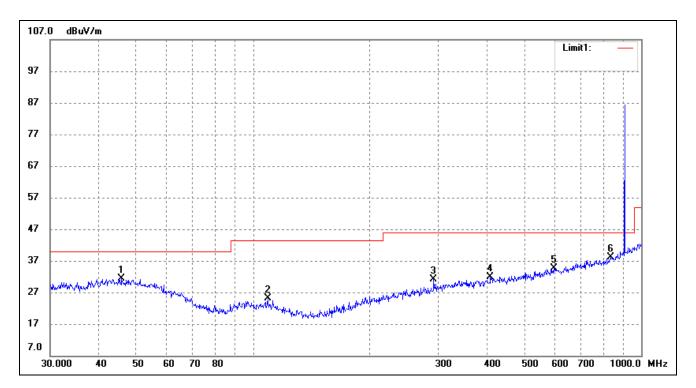

#### 4.4 Summary of Test Results/Plots

Note: this EUT was tested in 3 orthogonal positions and the worst case position data was reported.

Report No.: STR18118211I Page 11 of 23 FCC Part 15.249

Note: Testing is carried out with frequency rang 9kHz to the tenth harmonics, which above 3<sup>th</sup> Harmonics are attenuated more than 20dB below the permissible limits or the field strength is too small to be measured. The measurements greater than 20dB below the limit from 9kHz to 30MHz..

Report No.: STR18118211I Page 18 of 23 FCC Part 15.249

#### 5. Out of Band Emissions

#### **5.1 Standard Applicable**

Emissions radiated outside of the specified frequency bands, except for harmonics, shall be attenuated by at least 50 dB below the level of the fundamental or to the general radiated emission limits in §15.209, whichever is the lesser attenuation.

#### **5.2 Test Procedure**

As the radiation test, set the Lowest and Highest Transmitting Channel, observed the outside band of 902MHz to 928MHz, than mark the higher-level emission for comparing with the FCC rules.

#### **5.3 Summary of Test Results/Plots**

| Test mode | Frequency | Limit      | Dogult |  |
|-----------|-----------|------------|--------|--|
| Test mode | MHz       | dBuV / dBc | Result |  |
| Lowest    | 902.00    | <46 dBuV   | Pass   |  |
| Highest   | 928.00    | <46 dBuV   | Pass   |  |

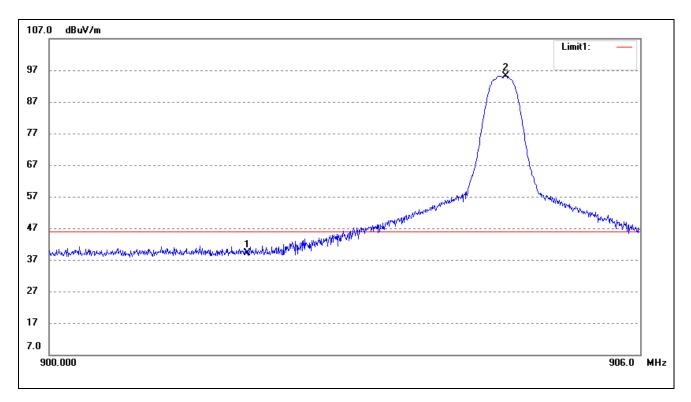

The edge emissions are below the FCC 15.209 Limits or complies with the 15.249 requirements.

Please refer to the test plots as below.

#### 6. Emission Bandwidth

#### **6.1 Standard Applicable**

According to 15.215 (c), intentional radiators operating under the alternative provisions to the general emission limits, as contained in §§15.217 through 15.257 and in Subpart E of this part, must be designed to ensure that the 20 dB bandwidth of the emission, or whatever bandwidth may otherwise be specified in the specific rule section under which the equipment operates, is contained within the frequency band designated in the rule section under which the equipment is operated. The requirement to contain the designated bandwidth of the emission within the specified frequency band includes the effects from frequency sweeping, frequency hopping and other modulation techniques that may be employed as well as the frequency stability of the transmitter over expected variations in temperature and supply voltage. If a frequency stability is not specified in the regulations, it is recommended that the fundamental emission be kept within at least the central 80% of the permitted band in order to minimize the possibility of out-of-band operation.

#### **6.2 Test Procedure**

According to the ANSI 63.10-2013, the emission bandwidth test method as follows.

Remove the antenna from the EUT and then connect a low loss RF cable from the antenna port to the spectrum analyzer.

Set span = 1MHz, centered on a transmitting channel

RBW ≥1% 20dB Bandwidth, VBW ≥RBW

Sweep = auto

Detector function = peak

Trace = max hold

All the trace to stabilize, use the marker-to-peak function to set the marker to the peak of the emission, use the marker-delta function to measure and record the 20dB down and 99% bandwidth of the emission.

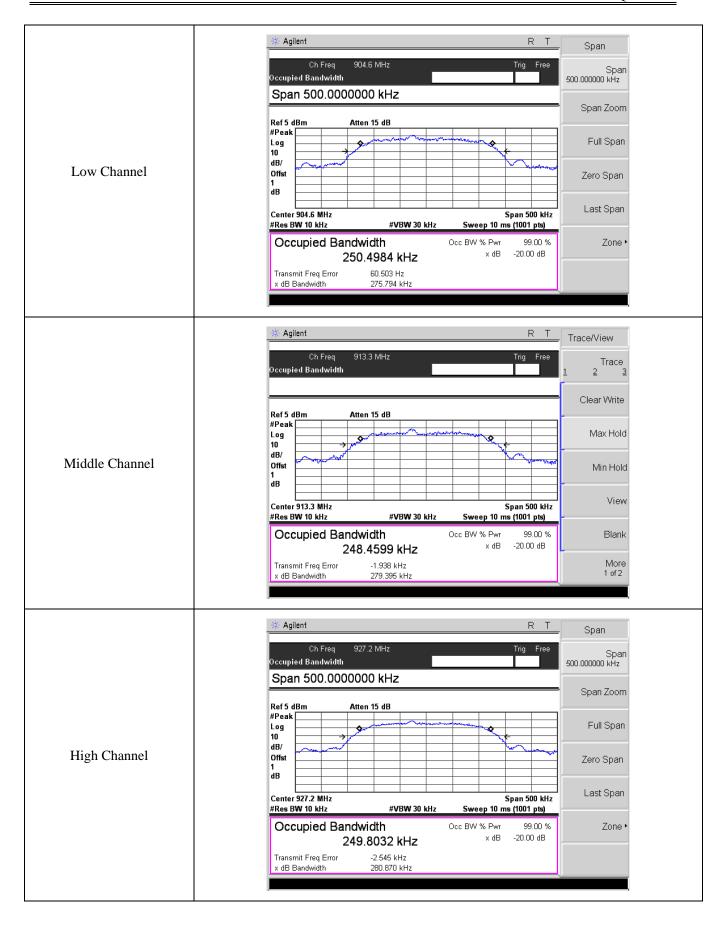

#### **6.3 Summary of Test Results/Plots**

| Channel        | Frequency<br>MHz | 20dB Bandwidth<br>kHz |
|----------------|------------------|-----------------------|
| Low Channel    | 904.6            | 275.794               |
| Middle Channel | 913.3            | 279.395               |
| High Channel   | 927.2            | 280.870               |
